

# COSC 221 - Introduction to Discrete Structures

## Lecture - Course Information and Overview of Topics

### Readings

- ▶ Chapter 2
- ▶ Computer Science Connections
  - ▶ Set Building in Languages (Section 2.3)
  - ▶ Clustering Datasets (Section 2.3)

- ▷ Instructors and Meetings
- ▷ Resources
- ▷ Policy
- ▷ Evaluation
- ▷ R U Ready?

# Course Information

- ▷ **Instructors and Meetings**
- ▷ Resources
- ▷ Policy
- ▷ Evaluation
- ▷ R U Ready?

- ▶ Lecture: MWF (12:00pm - 13:00pm)
- ▶ Seminar: M - F, one of 5 sessions
- ▶ Office Hours: 0.5 hour before each lecture

**Seminar starts next week**

## Professor and TAs

▷ **Instructor:** Yong Gao

▷ **TAs:**

Davit Abrahamyan (S1D)

Ahmed Radwan (S1B, S1C, S1E, S1F)

Q.1) Your instructor's first name is

student-guide/

- A) Young
- B) Yong
- C) Gao
- D) Yong and Gao

## Written Assignments (40%)

# Course Information

- ▶ Instructors and Meetings
- ▶ Resources
- ▶ Policy
- ▶ Evaluation
- ▶ **R U Ready?**

## Self-Check

- ▶ Chapter 2 of the Textbook. Do these words/phrases sound familiar?  
“variables, functions, sequences, Cartesian product”
- ▶ Computer Science Aspects. Feel comfortable to use these strange phrases?  
“for-loops, if-then-else, while-loops, ...”

## Required Courses

- ▶ Prerequisites: One of MATH 101, MATH 142, APSC 173.
- ▶ Co-requisites: COSC 121

Q.2) Do you have COSC 121?

- A) Yes
- B) No
- C) No, and I am not going to!
- D) Do I have to?

Q.3)  $A \subset B$  means that

- A)  $A$  or  $B$
- B)  $A$  is a proper subset of  $B$
- C)  $A$  is less than  $B$
- D)  $A$  goes before  $B$

Q.4) Let  $g$  be a function.  $g(x)$  is read

- A) "g of x"
- B) "g followed by x"
- C) "g with x"
- D) "g"

## Q.5) Set, Elements, and Subscripts

$$A = \{A_i \mid 3 * i, i \geq 1\}, \quad B = \{B_i \mid 2 * i, i \geq 1\}$$

The element  $A_{B_{10}}$  equals

- A) 30
- B) 20
- C) 60
- D) None of the above

### Address me as

- ▷ Yong (Preferred)
- ▷ Prof/Dr Gao (More formal)
- ▷ Prof/Dr Yong (Never!)

### Announcement 01: **Final Exam Question (5-10 points)**

- ▷ Describe/summarize ONE of the many “Computer Science Connections”
- ▷ A short paragraph suffices

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

the science of valid reasoning

## Calculus of Computing (Computer Science, ...)

- ▷ Propositional logic
- ▷ Predicate logic (calculus)
- ▷ ...

## Discrete Structure (or Structured Data)

- ▷ Objects
- ▷ Relationships

## Graph Theory in Computer Science and Mathematics

- ▷ Deep Questions
- ▷ Beautiful Theories
- ▷ Algorithmic Problems

- ▶ Graph Minor Theorem (1985, 500 pages of proof)
- ▶ Four Color Theorem (1976, 1997, computer-assisted proof)
- ▶ Strong Perfect Graph Theorem  
(Conjectured in 1961, proof in 2002, published in 2006)

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

## Discrete Structure (or Structured Data)

- ▷ Objects
- ▷ Relationships

## Graph Theory in Computer Science and Mathematics

- ▷ Deep Questions
- ▷ Beautiful Theories
- ▷ Algorithmic Problems

## Challenging, but of Practical Importance

- ▶ Shortest Paths
- ▶ Graph Coloring

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

## Combinatorics

Analytical Properties of

- ▷ Sets, Lists, Strings, Trees.

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

- ▶ Counting, Enumerating, and Searching
- ▶ Applications in combinatorial optimization, geometry, coding theory (information theory), linguistics, biology, ...

## Combinatorics

Analytical Properties of

- ▷ Sets, Lists, Strings, Trees.

# Topics to be Covered

and why in computer science

- ▷ (Formal) Logic
- ▷ Proof Techniques
- ▷ Structures: Graph Theory
- ▷ Combinatorics: Counting
- ▷ (Discrete) Probability

## Applications in Computer Science

- ▷ Randomized Algorithms
- ▷ Probabilistic Models for Social Networks
- ▷ Reasoning Under Uncertainty (AI)
